Assembly instructions: please follow step 1 - 10.

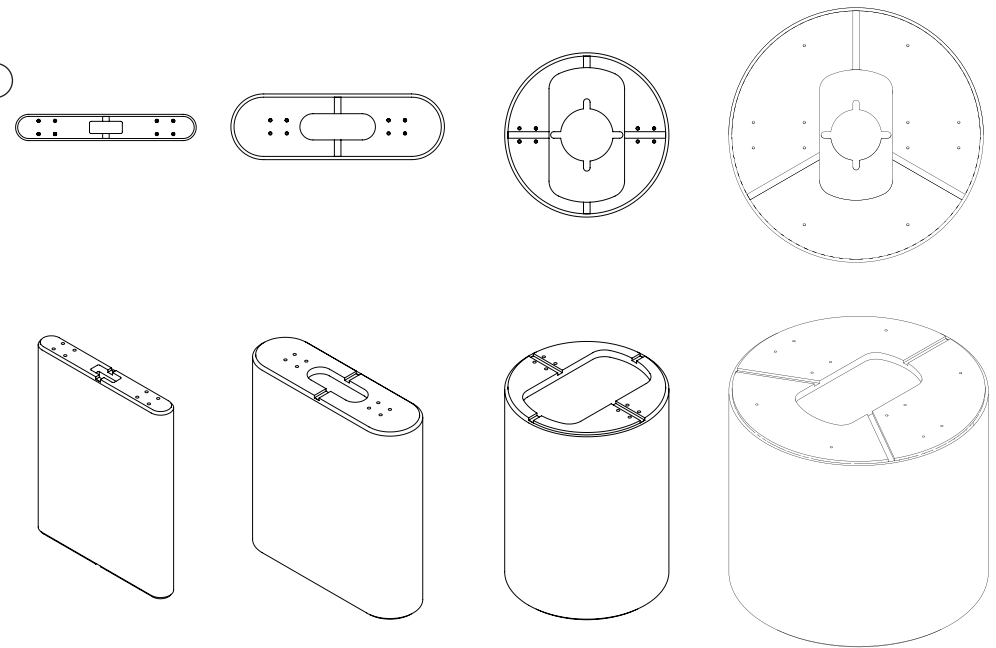

arco

②

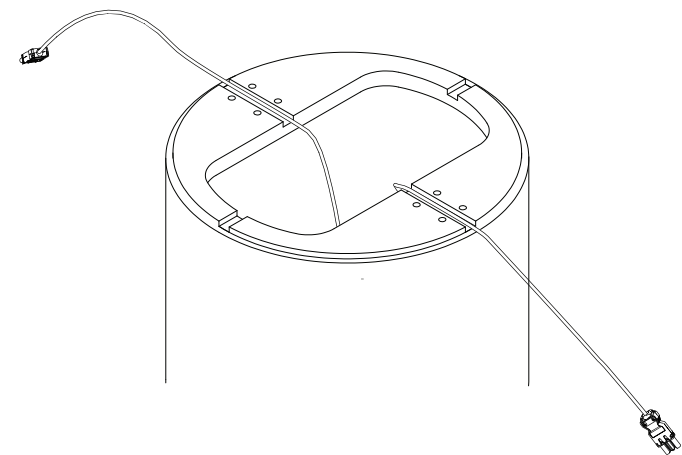

Connect the cables to the floor power outlet in the column.
It is also possible to route the cable underneath the column.

①

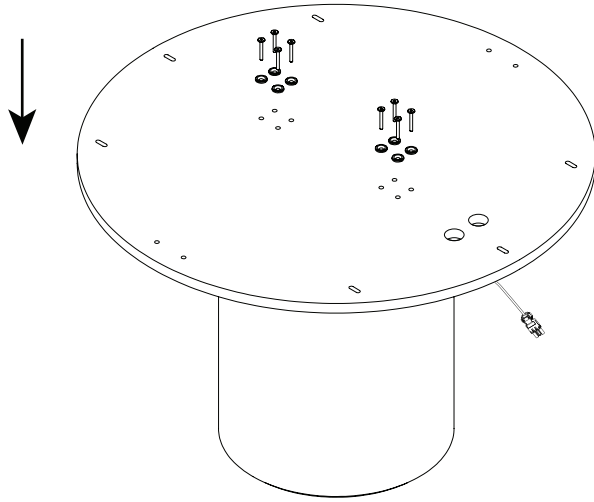

Assembly of all columns is identical

③

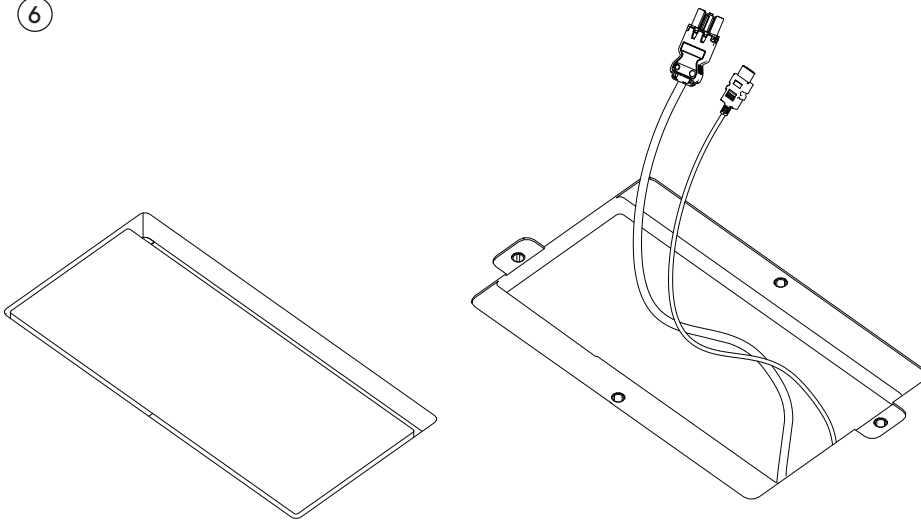

Place all cables flat in the designated slots **before**
placing the substructures!

④

Start placing the substructures on the column(s)

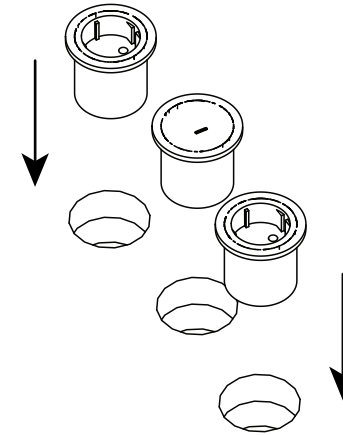

⑥

CM04:

Loop the cables through the cutout hole for the CM04

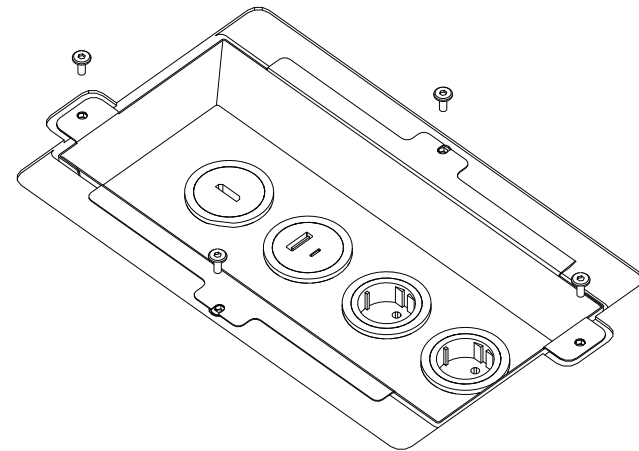

⑤

CM15:

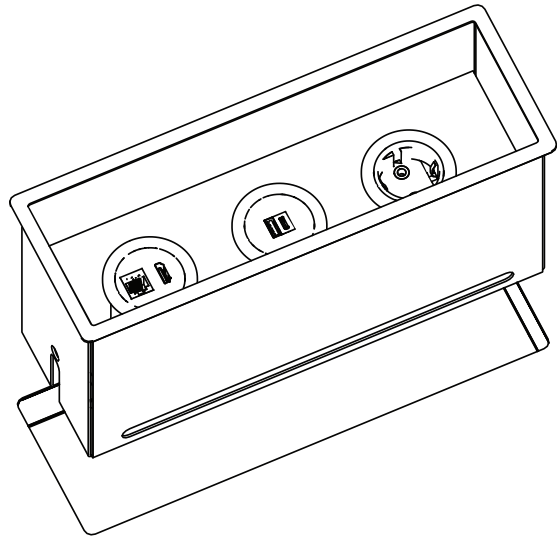

Insert the CM15 in the designated tabletop holes.
Connect them to the connectors on the bottom side.
Continue with the provided manual

⑦

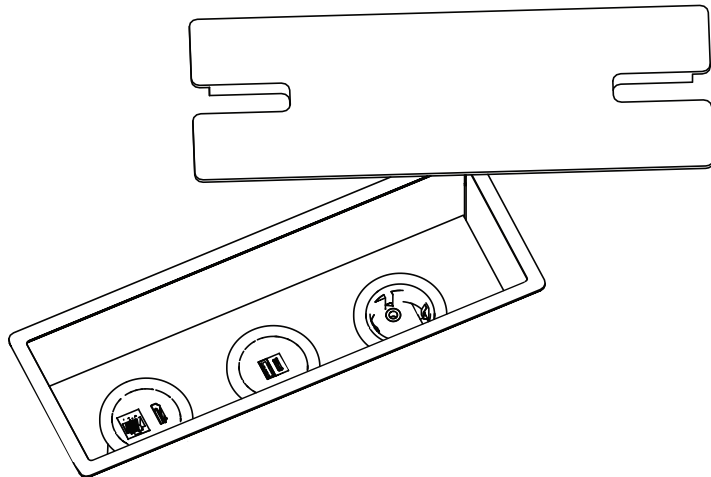

Connect the Spots to the cables.
Connect the CM04 unit to the substructure
Continue with the provided manual

8

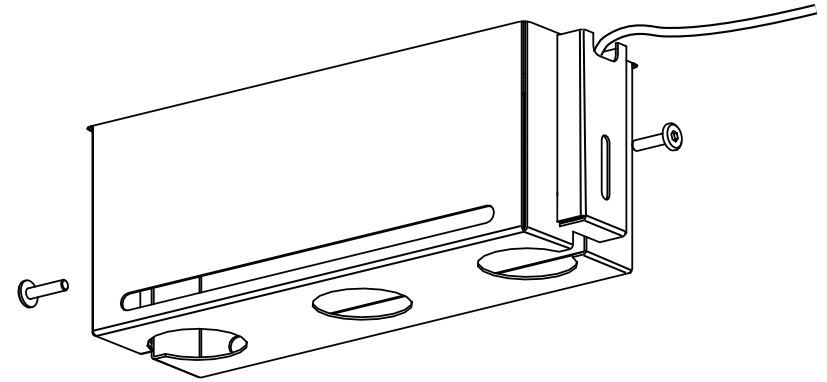

CM06:
Put the CM06 unit in the designated cut out

10

Continue with the provided manual.

9

Push the side of the CM06 so the CM06 clamps the table top.
Connect the Spots to the cables

In case the cable needs to run close under the table, loop the cable through the sides.
